Your Success, Our Technology.

Telemetry, IoT & Payments

Where Hardware & IoT Connects!

Experts with more than 10 year experience in Telemetry & Payments

We're the go-to experts in Telemetry & Payments, offering solutions customized to vending operator needs.

With our extensive compatibility, advanced telemetry, and comprehensive payment options, we're a premier choice for seamless business growth.

Effective Cost-cutting Tools

From real-time alerts to cash control, stock management, analytics, route planning, and remote management, we've got you covered! All our solutions are geared towards maximizing your business opportunities while minimizing costs.

Remote Hardware Control

Our seamless hardware and IoT integration enables remote device control. Whether updating payment systems, adjusting prices, or modifying system parameters like the cash database, you can make these changes without leaving the office.

The most advanced IoT, Telemetry & Payment platform

By having the most advanced Telemetry, IoT, and Payment platform you will gain a significant competitive edge. This integration enables you to streamline operations, reduce expenses, and enhance overall business efficiency, positioning you for substantial growth and success.

The Most Advanced IoT, Telemetry & Payment Platform

Monitor and manage your machines remotely to save time and money on unnecessary visits. No more guessing whether machines are working properly - gain full control and avoid any technical downtime.

Even more, we'll keep you informed of any potential issues and ensure your machines are operating optimally, guaranteeing uninterrupted sales.

Remote hardware control

Whether updating payment systems, adjusting prices, rebooting the machine, or modifying system parameters like the cash database, you can make these changes without leaving the office.

Immediate technical event alerts

Our alerts system allows you to receive alerts via email, text message or as a notification on your phone. The alerts are sent in near real-time so you will be instantly informed in case of an issue.

Advanced and precise real-time data

Get a wide range of data, such as real-time machine technical status, product stock levels and sales information, consumption trends, and detailed reports.

Route Planning

Visit your machines for product refill, technical maintenance, and encashment only when it is necessary. Vendon's Route Planning module helps to eliminate unnecessary costs and optimize daily operations.

Cash control

Have complete control of all cash and encashment information. See the exact amount of cash in your machines in real-time. Detailed encashment reports let you prevent money fraud and theft.

Loyalty solutions

With our wide array of loyalty solutions, you can reward your customers with bonuses and increase engagement. What's more, we offer an easy-to-use bonus management platform to streamline the process.

Safe and Accurate Payment Systems for Cash Validation

Connect a payment system with integrated cashless as master system to your vending machine: in this way you'll be able to differentiate the prices between cashless and cash and read all the accounting data by a master system, included the differentiated sales between cash and cashless, the number of coins in the tubes, the quantity of cash in cash-box and much more.

Unica

High precision 6-tube change-giver coin mechanism designed to increase revenue.

Hexis

5-tube change-giver coin mechanism with integrated cashless system.

Sofis

MDB change-giver coin mechanism for every location.

Creos

Multi-standard banknote reader for highly frequented vending locations.

Caesium Pro

Compact, reliable, and multi-functional coin validator.

Closed-loop Payment Solutions

Closed-loop payments continue to be popular in such private environments as offices and factories, as well as in mixed spaces, such as hospitals and universities - everywhere where employers want to be in control of access restrictions, incentivize workers through benefits and loyalty programs, and monitor and manage consumption.

Engine Connect

The most complete cashless payment system ready to give you maximum control over your vending machine.

Coges Engine

The electronic vending system with the most advanced cashless payment functions.

Unica

High precision 6-tube change-giver coin mechanism designed to increase revenue.
